

CLINICAL NEUROSCIENCES SYMPOSIUM

PRESENTED BY:

DR CJ HATTINGH & MR A SMITH

IN ASSOCIATION WITH BIOFEEDBACK ASSOCIATION OF SOUTH AFRICA

This comprehensive lecture series will cover all you need to know about the brain's structure and function and the effects of disease.

8-9 FEBRUARY 2020:

Neuroanatomy
Neurophysiology

7-8 MARCH 2020:

Clinical Neuropathology
Neuroimaging

The Balalaika Hotel, Sandton

Possible live streaming to Cape Town, Durban and Bloemfontein. See Registration Form.

EARN 30 CPD POINTS

Biofeedback Association of South Africa

This course is certified for 40 Continuing Education hours towards BCIA recertification

“

The Clinical Neurosciences Symposium is a four-day series of seminars presented over two weekends. Attendees are introduced to core concepts within the clinical neurosciences. The four-part series of seminars will focus on clinical neurophysiology, neuroanatomy, neuropathology and neuroimaging. These core concepts begin at an introductory level, and, with each seminar, develop in complexity. Attendees end the day with reinforced knowledge of fundamental principles, as well as an advanced clinical understanding of brain structure, function, disease and neuroimaging as a method of investigation.

The emphasis of the symposium is the clinical nature of these core areas that form the basis of the clinician's understanding of the client's daily functioning. The entire series of seminars is interrelated so that the attendee is able to obtain an integrated understanding of the brain in homeostasis and neuro dysregulation.

”
